Subject Index for Volume 18

Acid-base studies
after adrenalectomy 762
in glycerol-induced acute renal failure 432
Acid load, chronic
effect of sodium and potassium intake on renal adaptation to (abst) 799
Adrenalectomy
mineralocorticosteroid and glucocorticosteroid therapy for renal acid excretion after (abst) 803
renal acid-base regulation after 762
Adrenal insufficiency
role of vasopressin in 58
β-Adrenoceptor blocking agents
renal effects of 686
Albumin
and impaired protein-binding in uremia 86
vs. Ringer's solution, to study natriuretic response in rats 20
Aldosterone
in normal pregnancy 162
pharmacologic action of 623
Alkaline phosphatase
in $1,25(OH)_2D_3$ therapy 409
Allograft rejection
in pediatric patients 519
plasma exchange in, in steroid-resistant kidney (abst) 798
Amikacin
nephrotoxicity of 571
Amiloride
plus indacrinone, renal effects of 677
Aminoglycosides
nephrotoxicity of 571
Amyloidosis, renal
in pregnancy 192
Analgesic nephropathy
mechanisms in development of 553
SEM of renal papilla in (abst) 141
Anemia
of chronic renal failure, mechanism of 732
Angiotensin II
effect of efferent glomerular arteriole 323
in pregnancy 253
Antibodies, circulating
and proximal tubular injury in Heymann nephritis ..328
Anticonvulsants
for eclampsia 259
Antidiuretic hormone
and change in volemia at constant osmolality (abst) 135
effect of lithium on 601
Antiinflammatory drugs, nonsteroidal
effect on renin release (abst) 797
Aspirins
renal effects of 609
Arteriolar nephrosclerosis
in pregnancy 192
Azathioprine therapy
cessation of, after transplantation 110
Azotemia
diagnostic value of urine and serum indices in (abst) 532

Balkan nephropathy
and mycotoxins 656
Bartter's syndrome
prostaglandin-inhibitory drugs and 609
Bicarbonate reabsorption
in acute renal failure 432
Blood pressure
role of osmolality in, hemodialysis vs. ultrafiltration 480
Bone disease
and dialysis, treatment of (abst) 532
in children with chronic renal failure 519
Bone marrow
thymidine incorporation inhibited by uremic sera ..715
Brush border antibodies
and proximal tubular damage in Heymann nephritis 328
Brush border membrane
effect of phosphorus deprivation on 36

Calcium, serum
in $1,25(OH)_2D_3$ therapy 409
Calcium stone formers
fasting urinary calcium-to-creatinine ratio in (abst) .137
Calcium, urinary
in phosphorus deprivation 36
Calcium urolithiasis
effect of glucose ingestion on (abst) 797
Calcium-×-phosphorus product
in patients with pulmonary calcifications 95
Capillary lumen
in preeclampsia 241
Captopril
kinin system has no effect on 746
nephrotic syndrome during therapy with (abst) 534
Carbohydrate metabolism
exercise and, in hemodialysis 754
Cell fractionation techniques
to localize kininogenase activity in cortex 77
Cell membrane
and potassium adaptation 293
Cephaloglycin
vs. cephalosporin, nephrotoxic effects of 591
Cephalosporin
nephrotoxicity of 591
Circulating immune complexes
in IgA nephropathy 366
Cirrhosis, alcoholic
and IgA nephropathy 366

Citrinin
nephrotoxicity of 656
Clonidine
action in essential hypertension 351
effect on postischemic acute renal failure 309
Collecting duct
membrane changes in potassium adaptation 293
natriuretic response of, in ECF volume expansion ..20
Compensatory renal growth
effect of normal development on 29
Complement function
with different hemodialysis membranes 505
Cortex, renal
kininogenase activity in 77
Cortical necrosis, bilateral
in pregnancy 179
Creatinine
in uremic sheep 725
Cross-circulation experiments
automatic device for 510
Cyclic AMP phosphodiesterase activity
in isolated tubular segments 512
Cyclic GMP phosphodiesterase activity
in isolated tubular segments 512
Cystine stone formers
cystine crystalluria and urinary relative saturation in (abst) 137
Cysts
macropuncture study of, from adult polycystic kidneys 375

Dahl's hypothesis
role in essential hypertension 1
Dahl rats
pressure natriuresis in kidneys from 10
Density-gradient fractionation
to localize subcellular kininogenase activity 77
Desoxycorticosterone
in normal pregnancy 162
Dialysis, *see also* Hemodialysis, etc.
Advances in (suppl. 10) S-1–S-122
bicarbonate *d.*, with Redy system (abst) 533
computerized dialysate-delivery system for S-44
effect of blood transfusion on T-suppressor cells in (abst) 803
historical, theoretical, and practical aspects of S-33
in children, results of 15-yr study 103
in obstetric acute renal failure 179
intradialytic tolerance in S-56
mathematic modeling of S-2
membranes for S-19
cellulose type of S-26
peritoneal *d.*
concepts and applications of S-111
iodine and toxicity in (abst) 531
transport rates for S-117
pharmacokinetic and metabolic modeling of S-11
purification of fluid for, to eradicate encephalopathy 115
transplantation and, South African Registry's annual report (abst) 531
ultrafiltration during S-77

Diazepam
for eclampsia 259
Diazoxide
for eclampsia 259, 269
Digitoxin
overdose, hemoperfusion to treat S-101
1,25-dihydroxyvitamin D
current status of, for renal osteodystrophy 409
Dioxins
renal effects of 648
Diuretics
and eclampsia 263
in pregnancy 162, 271
uricosuric *d.*, renal effects of 677
DNA synthesis
inhibitor of, in bone marrow, in uremia 715
Dopamine
pharmacologic action of 623
Drug intoxication
hemoperfusion for S-106
Drugs
renal metabolism of 636
Symposium on drug effects on the kidney ...539–711

Eclampsia
and preeclampsia in pregnancy 234
management of 259
Electroencephalographic findings
in dialysis encephalopathy, fractures, and myopathy 115
Encephalopathy
of dialysis, with fractures and myopathy 115
Endothelium
in preeclampsia 241
Environmental chemicals
renal effects of 648
Erthropoiesis
in sheep model for uremia 732
Essential hypertension
clonidine's action in 351
Dahl's hypothesis and 1
Exercise training
metabolic effects of, in hemodialysis patients 754
Extracellular fluid volume expansion
natriuretic factor and 20

Fasting
effect on renal response to phosphorus deprivation ..36
Follicle-stimulating hormone
and delayed puberty in males with chronic renal failure 344
Free-flow electrophoresis
to localize subcellular kininogenase activity 77

Gentamicin nephrotoxicity
cell biology approach to 583
drug study of 571
in human kidney (abst) 136
Glomerulonephritis
effect of hypertension on course of (abst) 142
focal *g.*, in pregnancy 192
immune function in (abst) 530
infective endocarditis and (abst) 803

intrarenal pressure and sodium excretion in (abst) ..143
membranoproliferative *g.*
in preeclampsia 241
in pregnancy 192
nonsteroidal antiinflammatory agents to treat (abst) 138
membranous *g.*, with interstitial infiltration by lipophages, nodular regenerative hyperplasia of liver, and mixed cryoglobulinemia (abst) 139
mesangial proliferative *g.*, IgM and (abst) 803
PEG-EDTA technique to detect circulating immune complexes in (abst) 138
Glomerulopathies
in pregnancy 192
Glomerulosclerosis
focal and segmental *g.* and hypertension (abst) 140
in pregnancy 192
Glomerular filtration rate (GFR)
and nephrogenesis after unilateral nephrectomy 29
effect of endogenous AII on 323
feedback control of, after unilateral nephrectomy ...48
in glycerol-induced acute renal failure 432
obstructive nephropathy and 281
of single nephron during perfusion with nonelectrolyte solutions 460
RBF autoregulation in acute renal failure and 68
Glomerulus
changes in, in preeclampsia 241
efferent arteriole of, effect of endogenous AII on ...323
endothelial cells of, tissue culture of (abst) 136
filtrate of, in polycystic kidney 375
filtration barrier of, and mercury-uptake in kidney lysosomes 445
function in acute renal failure in man 495
lesions of, in preeclampsia 241
ultrafiltration in, phthaldehyde microprotein method to study 390
Glucocorticoid deficiency
impaired water excretion of, role of vasopressin in ..58
Glucose
reabsorption of, in acute renal failure 432
renal handling of, in normal pregnancy 152
D-Glucose
uptake of, after phosphorus deprivation 36
α-Glucosidase
of high specificity in basement membranes and collagens (abst) 140
Goodpasture's syndrome
anti-type IV procollagen and antilaminin antibodies in (abst) 136

Hemodialysis
acetate conversion to bicarbonate during S-51
acetate metabolism and acid-base homeostasis during S-62
and delayed puberty in males 344
blood lipids, uric acid, and allopurinol therapy in (abst) 531
by temporary venous subclavian cannulation (abst) 801
carpal tunnel syndrome in (abst) 801
complications in, an overview 783
effect of *d, l*-carnitine in (abst) 797
effect of propranolol on PTH in (abst) 530
encephalopathy of, with fractures and myopathy ..115
exercise and, metabolic effects of 754
folic acid supplements for (abst) 142
for chronic renal failure
changes of pure pancreatic secretion (abst) 136
systemic angiography of vascular access in (abst) 137
hemodynamic changes during S-83
in sheep model of uremia 725, 732
left ventricular function in (abst) 535
liver biopsy data and HB virus antigenemia in (abst) 800
membranes for S-19
leukopenia, hypoxia, and complement function with 505
pulmonary calcification detected in patients on 95
true porphyria cutanea tarda in, delayed appearance (abst) 532
vs. ultrafiltration, role of osmolality in blood pressure stability 480
Hemodynamics, renal
in normal human pregnancy 152
in pregnant rat 173
of RBF autoregulation in acute renal failure 68
Hemofiltration
closing the loop in S-93
for chronic renal insufficiency (abst) 534
hemodynamic changes during S-83
reducing substitution fluid volume in S-97
technical considerations in S-91
Hemoglobinuria, paroxysmal nocturnal
proximal tubular siderosis in (abst) 801
Hemolytic-uremic syndrome, adult
nephrology forum on 125
Hemoperfusion
digoxin and digitoxin removal by S-101
for drug intoxication S-106
with charcoal, in infants 386
Henoch Schonlein purpura
immunology of 366
Hepatic peliosis
nephropathy and (abst) 800
Hepatitis B
passive-active immunization against (abst) 798
vaccine against
in adults (abst) 801
in children (abst) 800
Heymann nephritis
antibody-mediated injury to proximal tubules in ...328
Hexachlorobenzene
renal effects of 648
HLA-typing
and cessation of immunosuppressive therapy after transplantation 110
Hydralazine
for eclampsia 259, 268
Hydration
effect of furosemide during 454
Hydrostatic pressure in renal pelvis
and obstructive nephropathy 281
Hypercalciuria
ambulatory test to analyze (abst) 139

Hyperparathyroidism
and red cell production (abst) 137
Hypertension
in pediatric patients after renal transplantation 519
Hypertension
in pregnancy 234
control of vascular responsiveness in 253
management of 264
treatment of 267
pressure natriuresis and 10
Hypertrophy, renal
during normal development 29
Hypoxia
with different hemodialysis membranes 505

IgA nephropathy
immunology of 366
in pregnancy 192
treated with plasma exchanges alone (abst) 135
Immune complexes
platelet-aggregating type of, in idiopathic glomerulonephritis and lupus nephritis (abst) 142
Immunology
of Heymann nephritis 328
of IgA nephropathy 366
Immunosuppressive therapy
cessation of, after transplantation 110
Indacrinone
renal effects of 677
Indomethacin
renal effects of 609
Interstitial nephritis
in pregnancy 192
Intravascular coagulation
in acute renal failure during pregnancy 179

Kallikrein, renal
subcellular localization of 77
Kanamycin
nephrotoxicity of 571
Kininogenase
subcellular localization of 77
Kinin system
no role in effect of captopril 746

Lead toxicity
in occupational exposure, effects on renal function .489
Leukopenia
with different hemodialysis membranes 505
Ligand binding
in uremia 86
Lipoid nephrosis
in pregnancy 192
Lipids
metabolism of, and excercise, in hemodialysis 754
plasma clearance of, in uremia and after transplantation 774
Lithium
renal effects of 601
Liver disease
and acute renal failure in pregnancy 179
Lung scan
to detect pulmonary calcification 95

Lupus erythematosus, systemic
effect of plasmapheresis on (abst) 801
Lupus nephritis
mouse model for treatment of (abst) 798
oral contraceptive therapy and (abst) 799
Lupus nephropathy
pregnancy and 207
Lysosomes, renal
and kininogenase activity 77
mercury accumulation during proteinuria in 445

Magnesium
urinary excretion of, in phosphorus deprivation 36
Magnesium sulfate
for eclampsia 259
Medulla, outer
collecting duct cells in, in potassium adaptation 293
Membranous nephropathy
idiopathic *m.n.*, role of major histocompatibility system in (abst) 802
in pregnancy 192
Mercury
accumulation of, in kidney lysosomes of proteinuric rat 445
Mesangium
in preeclampsia 241
Methyl dopa
for hypertension in pregnancy 270
Microperfusion studies
on tubuloglomerular feedback, with nonelectrolyte solutions 460
Mineralocorticoids
effect on acid-base regulation after adrenalectomy .762
in normal pregnancy 162
Mycotoxins
renal effects of 656
Myeloma light chains
nephrotoxicity of (abst) 535
Myopathy
and fractures, in hemodialysis encephalopathy 115

Natriuretic factor
ECF expansion and 20
Neomycin
nephrotoxicity of 571
Nephrectomy, unilateral
compensatory renal growth after 29
resetting of tubuloglomerular feedback after 48
Nephritis, hereditary
and May Hegglin's anomaly (abst) 135
Nephrogenesis
after unilateral nephrectomy 29
Nephrons
effect of sodium vanadate on 302
functional heterogeneity of, in obstructive nephropathy 281
in adult polycystic kidney disease 375
Nephrotic syndrome
after portacaval shunt in cirrhosis (abst) 801
after renal transplantation 358
clofibrate pharmacokinetics in (abst) 138

dimer albumin formation in urine of patients with (abst) 142
T-cell lymphoma and (abst) 797
Nephrotoxicity
acute renal failure and 700
aminoglycosides and 571
gentamicin and, cell biology approach to 583
mycotoxins and 656
occupational lead exposure and 489
with urographic radiocontrast drugs 540
Nephrotoxic serum nephritis
effect of parathyroidectomy on (abst) 530
Netilmicin
nephrotoxicity of 571
Nonsteroidal antiinflammatory drugs
renal effects of 609

Obstructive nephropathy
pathophysiology of 281
Ochratoxin A
nephrotoxicity of 656
Osmolality
role in blood pressure stability after dialysis and ultrafiltration 480
Osteodystrophy, renal
use of $1,25(OH)_2D_3$ for 409
Osteomalacic fractures
and myopathy in hemodialysis encephalopathy 115
Oxygen transport
in sheep model for uremia 732
Ozoline
renal effects of (abst) 799

Papilla
collecting duct cells in, in potassium adaptation 293
Papillary necrosis
experimental model of (abst) 140
Paraaminohippurate
and urate excretion, in study of drug actions 665
secretion of, in acute renal failure 432
Paracetamol
in analgesic nephropathy ....531 (abst), 553
metabolism by isolated perfused kidney 562
Parathyroid hormone
and acid-base homeostasis (abst) 533
in $1,25(OH)_2D_3$ therapy 409
Pelvic stones, renal
of glafenic acid, after long-term analgesic therapy (abst) 139
Perfusion studies
of drug effects, advantages and disadvantages of 562
Phenacetin
in analgesic nephropathy 553
Phenytoin
binding of, in uremia 86
Phosphate
excretion of, in obstructive nephropathy 281
poisoning from, hemoperfusion with hemodialysis to treat (abst) 139

Phosphorus
deprivation of, renal response to 36
serum concentration of, in $1,25(OH)_2D_3$ therapy 409
Phthalaldehyde microprotein method
usefulness and potential errors of 390
Pituitary-testicular axis
in males with chronic renal failure 344
Cis-Platinum diamminedichloride
and acute renal failure 700
Plasma factor VIII activity
in Blacks with renal disease (abst) 534
Platelet antigens
in human kidney disease 472
Polybrominated biphenyls
renal effects of 648
Polychlorinated biphenyls
renal effects of 648
Polycystic kidney disease
in pregnancy 192
macropuncture study of 375
results of transplantation for (abst) 532
Portal systemic shunts
and IgA nephropathy 366
Potassium
changes in membrane surfaces of collecting duct cells in adapting to 293
excretion of
in acute renal failure 432
in Dahl vs. normotensive rats 10
in obstructive nephropathy 281
Prednisone therapy
cessation of, after transplantation 110
Preeclampsia
management of 259
renal morphology in 241
treatment of 269
Pregnancy
acute renal failure in 179
after renal transplantation 221
and kidney disease 192
and the kidney (Symposium) 147–278
control of vascular responsiveness during 253
hypertension in 234, 267
lupus nephropathy and 207
management of preeclampsia and eclampsia of 259
preeclampsia in, renal morphology of 241
renal hemodynamics and volume homeostasis in rat during 173
renal physiology in normal *p.* 152
sodium and mineralocorticoids in normal *p.* 162
Pressure natriuresis
in Dahl rats 10
Pronetholol
renal effects of 686
Propranolol
renal effects of 686
Prostaglandins
in pregnancy 253
renal effects of drug that inhibit synthesis of 609
role in furosemide's effect on vasodilation 454
role in obstructive nephropathy 281
Protein-binding inhibitor, plasma
in uremia 86

Protein excretion
and antibody-mediated tubular damage in Heymann nephritis 328
by healthy kidney 396
Proteinuria
and anionic sites in glomerular basement membrane (abst) 798
in asymptomatic patient, mechanism and clinical significance of 395
mercury accumulation in kidney lysosomes after ..445
Pulmonary calcification
detection in patients on hemodialysis 95

Renal artery stenosis, bilateral
in pregnancy 192
Renal blood flow
furosemide-induced increase in 454
impaired autoregulation of, in acute renal failure 68
Renal disease
chronic *r.d.*, and pulmonary calcification detection ..95
end-stage *r.d.* in children, treatment of (15-yr study) 103
platelet antigens in 472
Renal failure
acute *r.f.*
after contrast media is given (abst) 135
effect of clonidine on 309
impaired autoregulation in 68
induced by glycerol, tubular function in 432
in pregnancy 179
pathophysiology of 495
pharmacologic agents used for treatment of 700
chronic *r.f.*
ambulatory peritoneal dialysis for (abst) 533
and tuberous sclerosis (abst) 800
delayed puberty in males with 344
impaired plasma triglyceride clearance after ...774
in children, and transplantation 519
iron absorption in (abst) 530
model of, in sheep 725, 732
plasma and urinary oxalic acid in (abst) 799
sexual function in (abst) 141
induced by drugs 609
Renal hemodynamics
effect of kinin system and captopril on 746
Renal pelvic refluxes
during rising urine flow rate 419
Renin-angiotensin system
kinin system and captopril effects on 746
Renin substrate
converted in kidney to AII, effect on efferent glomerular arteriole 323
Ringer's solution
vs. albumin solution, to study natriuretic response in rats 20

Salt restriction
in normal pregnancy 162
Saluretic substance, circulating
essential hypertension and 1
Scleroderma
renal involvement in (abst) 798
resolution of malignant hypertension and acute renal failure in (abst) 139
Sheep
as model for chronic renal failure 725, 732
Sickle-cell nephropathy
in pregnancy 192
Sodium
chronic depletion of, kinin system has no effect on .746
exchangeable body *s.*, clonidine's action on 351
excretion of
and natriuretic factor in ECF expansion 20
difficulty in, in essential hypertension 1
in hypertension in Dahl rats 10
in obstructive nephropathy 281
in normal pregnancy 162
intake of
essential hypertension and 1
in Dahl vs. normotensive rats 10
Sodium nitroprusside
contraindicated in pregnancy 263
Sodium orthovanadate
effect on whole kidney and single nephron function 302
Sodium-potassium ATPase activity
and kininogenase activity in renal cortex 77
in glycerol-induced acute renal failure 432
Sorbistin
as new non-nephrotic aminoside (abst) 140
Stop flow pressure
during perfusion with nonelectrolyte solutions 460
Streptomycin
nephrotoxicity of 571
Sympathetic nervous system
inhibitory action of clonidine on 351

Technetium-99m diphosphonate scanning
to detect pulmonary calcification 95
Tetanus
and renal function (abst) 534
Thrombotic microangiopathy
and hemolytic-uremic syndrome 125
Thromboxane
and prostaglandin synthesis 609
synthetase inhibition and B_2 administration, effect on glomerulus (abst) 802
Thymidine
inhibitor of, in sera of uremics 715
Ticrynafen
renal effects of 677
T lymphocytes, human
cell surface proteins on (abst) 800
Tobramycin
nephrotoxicity of 571
Transplantation, renal
and delayed puberty in males 344
cessation of immunosuppressive therapy after (national survey) 110
feedback control of GFR in transplanted kidney 48
hypertension after (abst) 532
impaired plasma triglyceride clearance after 774
in children 519
results of 15-yr study 103
nephrotic syndrome after 358

parenthood following 221
plasma and urine aluminum kinetics after (abst) 137
porphyrins in (abst) 531
Triglyceride, plasma
impaired clearance of, in uremia and after transplantation 774
Tryptophan
binding of, in uremia 86
Tubules
acute necrosis of, and hemolytic-uremic syndrome 125
enzyme activity in 512
in adult polycystic kidney disease 375
in glycerol-induced acute renal failure 432
in preeclampsia 241
obstruction of, and pathophysiology of acute renal failure in man 495
proximal *t*
antibody-mediated injury to, in Heymann nephritis 328
effect of sodium vanadate on fluid of 302
mercury accumulation and lysosomal system in .445
Tubuloglomerular feedback
after unilateral nephrectomy 48
during perfusion with nonelectrolyte solutions 460
furosemide and 454

Ultrafiltration
during dialysis S-77
sequential *u.*, hemodynamic changes during S-83
vs. hemodialysis, role of osmolality in blood pressure stability 480
Urate
renal excretion of and drug action on 665
renal handling of, in normal pregnancy 152
Uremia
impaired plasma triglyceride clearance in 774
inhibitor of thymidine incorporation in sera of patients with 715
physiology of, in sheep 725, 732
plasma-binding inhibitor in 86
Uremic hyperparathyroidism
alcohol-stimulated calcitonin levels in diagnosis of (abst) 533
Uricosuric diuretics
renal effects of 677
Urinary tract infection
bacterial adherence in (abst) 141
Urine acidification
in obstructive nephropathy 281
Urine-blood P_{CO_2}
in acute renal failure during sodium bicarbonate infusion 432
Urine concentrating ability
in obstructive nephropathy 281
Urine flow rate
renal pelvic refluxes during 419
Urographic radiocontrast drugs
nephrotoxicity of 540

Vasodilators, renal
effect on papillary hemodynamics and sodium excretion (abst) 138
mechanism of furosemide's effect on 454
Vasopressin
effect of clonidine on 309
role in impaired water excretion of glucocorticoid deficiency 58
Volume homeostasis
in pregnant rat 173

Water excretion
in glucocorticoid deficiency, role of vasopressin in ..58

Xenobiotic chemicals
renal effects of 648
